Magic Chafer®

The revolution in chafing dishes

The Magic Chafer is the only chafing dish on the market that provides a scientifically precise Humidity Control System

Humidity Control System®

Thanks to its HCS® patented Water Pan, the Magic Chafer® provides the exact amount of steam necessary for any given dish. The HCS® Water Pan is divided into 5 compartments, a large central one and 4 smaller ones. By filling all, some, or none of them, you will be able to control the amount of steam generated by your Magic Chafer®.

Different dishes require different levels of humidity to maintain their taste, freshness and texture for longer.

TYPE OF FOOD	HUMIDITY REQUIRED	HCS® WATER PAN FILLING OPTIONS	Steam production / water consumption per hour at 75°C
 Rice, steamed vegetables and fish, etc	 High Humidity	 	50 cl /h 500 g /h
 Stewed meat, fish, vegetables with any type of sauce, etc	 Limited Humidity	 	26 cl /h 260 g /h
 Roasted and broiled meats, fried food, baked potatoes, etc	 No Humidity	 	0 cl /h 0 g /h

CARE AND MAINTENANCE

(Sorted by by product category/material)

Freestanding buffetware, Action Stations and banqueting furniture

- » Stainless Steel parts: Wash the items with hot water and neutral detergents on a soft cloth (do not use detergent containing chlorine and/or alkaline cleaners). Dry the items thoroughly and store them in a dry place. Never use any type of scarper or steel wool which will scratch the surface of the items. The items must be washed as soon as possible after use to avoid any prolonged contact with food remnants. Do not wash in the dishwasher.
- » PETG elements (transparent covers): Wash the items with water and neutral detergents on a soft cloth (do not use detergent containing chlorine and/or alkaline cleaners). Never use any type of scarper or steel wool which will scratch the surface of the items. Do not wash in the dishwasher.
- » High Pressure Laminates (HPL): wash HPL items with water and neutral detergents on a soft cloth. Never use any type of scarper or steel wool which will scratch the surface of the items. Do not wash in the dishwasher.
- » Organic & Mineral Risers: Ecoresin, like all thermoplastic resin materials, should be cleaned periodically a regular, seasonal cleaning program will dramatically help prevent noticeable weathering and dirt build up. Rinse the sheets with lukewarm water (be careful not to expose edges of organic or fabric interlayers to water) remove dust and dirt from the risers with a soft cloth or sponge and a solution of mild soap and/or liquid detergent in water. Rinse thoroughly with lukewarm water. Never use scrapers or squeegees. Keep edges dry and free of liquids. Do not rub with a dry cloth. Because the materials used are organic in nature (i.e leaves, branches and twigs) it is natural for them to alter slightly in appearance over time. Natural materials are also subject to inherent inconsistency in color, texture and shape. Slight delamination on saw cut edges is also to be expected.

Flatware

- » Stainless Steel: Wash the items in hot water and neutral washing detergent after each use. Do not use detergents containing chlorine and/or alkali cleaners, then dry thoroughly the items and store them in a dry room. Never use any type of scraper or steel wool which will scratch the surface of the items. Any food remains should be thoroughly cleaned up. The items must be washed as soon as possible after use. When washing in a dishwasher of make sure that at the end of the cycle the items come out perfectly dry otherwise wipe them thoroughly by hand. The above recommendations are particularly meant for the care of the blades, which are made of Aisi 420 stainless steel. This type of stainless steel is the most suitable to ensure a long-lasting cutting edge to the blades, but it is less resistant to the corrosion than the 18-10 (Aisi 304) stainless steel type, which is used to manufacture the forks, the spoons and the handles of the hollow handle knives.
- » Silver-plated: The same maintenance instructions of the stainless-steel ware apply. The silver coating can oxidize due to the contact with certain types of food and in very humid climates. This process is not a defect and it is not a sign of damage, but it is a natural characteristic which only alters the color of the surface, initially to yellowish and eventually to brown. Oxidation can be quickly removed with a common silver polishing product, either in form of paste or of liquid solution. In the latter case, it must be taken the precaution of avoiding a prolonged contact of the solution with the stainless-steel blades as they could be affected by corrosion. The items must be removed from the dishwasher as soon as the cycle is completed and wiped dry with a soft cloth, even if they seem dry. The period pf time that the items are exposed to hot steam and the hydrochloric acidity created within the dishwasher, therefore items should be removed as soon as possible from the dishwasher after the end of the washing cycle.
- » PVD and Titanium Coated: In case of appearance of dark spots (caused by organic substances and/or calcium deposits due to an inadequate washing /drying cycle), remove them by simply wiping off the surfaces with a soft cloth soaked with lemon soap or vinegar. If the lemon soap or the vinegar are not sufficient to remove particularly resistant spots, then (and only in that case) use a soft cloth soaked with a liquid metal polisher. We recommend using "Sidol" by Henkel, but most probably any kind of liquid metal polisher is as good as "Sidol". Avoid polishing the surfaces with abrasive cloth or metal polishing paste. Never use scrubbing sponges. PVD coated flatware does not tarnish, and does not require any special maintenance otherwise. In order to delay as much as possible the incurrence of visible wear and tear, handle with as much care as possible during the washing cycle. Wash and store the knives separately from the forks and the spoon.
